ZABRISKIE SAYS BELMONT STRIKE IS REGULAR BONANZA

Associate of Borax Smith Sees Return of Old Time Prosperity---Dissention on Directorate is the Only Cloud

The following interview is taken from the New York Commercial of April 16, and portrays the views as expressed by Chris Zabriskie, who was a recent visitor to this camp.
The new strike on the Tonopah Belmont property is the greatest bonanza ever developed in the Tonopah district, in the opinion of C. B. Zabriskie who has just returned to that camp where he inspected the mines of the Tonopah Belmont and the Tonopah West End companies of which he is a director. Mr. Zabriskie, who is associated with F. M. Smith in his railway and mining enterprises in Nevada as well as in the Pacific Coast Borax company, declares that the great activity in Tonopah mining affairs is the result of extraordinary developments in the mines and not of any boom movement.
"Tonopah is looking better than I have seen it for years," said Mr. Zabriskie, "and the camp is taking on some of its old time prosperity."
The Belmont has made a wonderful strike on the 1100-foot level and is now opening up the same ore body on the 1000-foot level. The pay shoot, so far as proved, shows a width of 16 feet and the ore samples from \$50 to \$60 a ton. This development has already added several million dollars to the value of the Belmont mine, to say nothing of the speculative value it gives to the neighboring properties to the east of the Mizpah fault, the dead line fixed by J. E. Spurr four or five years ago in his official report to the United States geological survey on ore deposits of the Tonopah district. On account of the developments, the Belmont mine is now in splendid shape and the

company has \$300,000 in the treasury."

To Retire from Board.

The only cloud in the sky for Belmont, Mr. Zabriskie said, is the dissension in the board of directors. "My principal object in going on the board at the last meeting was to try and promote peace and harmony among the conflicting interests. I have found that I cannot accomplish my purpose, and that being the case, I do not propose to remain on the board. I still have hopes, however, that the warring elements may soon be harmonized."

"The Philadelphians are buying Belmont stock. I am informed that Cal. Brougher now owns 160,000 shares and that he has received a large number of proxies, but it is doubtful whether he can control a sufficiently large proportion of the stock to make him a dangerous factor at the May meeting."

Other directors of the company wired him only yesterday to remain on the board but he says he sees no reason why he should alter his decision.

"The Tonopah West End property," Mr. Zabriskie said, "is in fine condition and is rapidly being put in shape for a big production. Development work is being pushed energetically on the 200, 275 and 400 levels and large reserves of ore are being blocked out on all three levels. We have ordered an additional compressor, and when it is installed we will do away entirely with hand drilling in the mine. We have also ordered a mechanical ore sorter like the one in use at the Belmont mine. In fact, we are putting the mine in shape and equipping it so that it may be worked vigorously, economically and scientifically."

"Several months ago we took up the matter of erecting a mill at the mine to handle the low grade ore, but on account of the exceedingly satisfactory rates we are now getting from the smelters, the mill project is being held in abeyance. Just now the smelters are short of silicious ores, and they have given us rates that justify us to continue shipping for the present."

Reports West End in Good Shape.
"Because of these low smelter rates and the better saving effected by the smelters over the milling process, we shall ship our ores as long as the favorable situation continues. Eventually, of course, we shall erect a mill to reduce the large tonnage of low grade milling ore which is being blocked out in the mine and accumulating on the dumps in the course of development."

When asked if any steps were being taken toward the building of the Ely-Goldfield railroad in which Mr. Zabriskie is largely interested, he said that plans were under consideration for establishing an eastern terminus other than Ely but that he was not at liberty to discuss them.

"The refusal of the town of Ely to grant us the franchise to enter the town put an end to our plans to enter it. We considered that we were undertaking a project that would be a great benefit to the camp and we expected the hearty co-operation of Ely. We were asking for no bonus and the terms of the franchise we asked for we considered very reasonable. We have taken no steps looking to entering Ely since the franchise was refused, but we have other plans under way."

STOCK MARKET

Tonopah Mining was the only stock that made a gain yesterday at the session of the San Francisco stock exchange, gaining fifteen cents on the day's trading. Belmont weakened and at the close of the session was quoted at a loss of 12 1/2 cents. Montana lost two points while West End fell back one point.

The following quotations furnished by H. E. Epstine, broker:

THE FOOL KILLER MISSED THESE MEN

ELY, Nev., April 21.—After spending a week in the vicinity of Lundy searching for a long lost mine that was supposed to have been located in 1860, William Roberts, Joseph Gilbert and Frank Rogers have returned to Ely without discovering the supposed bonanza of the early days.

Tradition states that an aged man traveling to California in the early days found some rich gold ore about five miles from Lundy, and expected to return to Nevada to develop the mine after he had completed his journey to the coast. He died shortly after his arrival in California, but left explicit instructions as to where his rich gold mine was situated.

Roberts and his associates, although they traversed many miles of country near Lundy, were not able to get any trace of mineral through the country which they examined.

Why Send Out of Town for Your Printing

When you can have first-class work done right here, by first-class union printers.

The business man who sends out of town for his printing injures his own business as well as that of others. While on the other hand the man who patronizes home institutions increases the town's pay roll, and thereby builds up his business.

The printers and book binders in the cities of surrounding states do not come here to spend their money.

Do You Know

That the Bonanza has an up-to-date Job Printing Plant and one of the best equipped Ruling and Binding Plants in the West?
